UTOCAD PLUGIN

Plugin with GEWISS products for AUTOCAD[®]

INDEX:

10 - 🧕 Main functions	3
20 - 😔 Update with GWSINC	4

10 - Main functions

The Autocad[®] plugin provided by GEWISS contains the technical design (front, side, and dimension view) for the products included in the catalogue.

By the icon is possible to open the plugin in the bottom of the window, anyway it can be moved like all other Autocad[®] sections:

The plugin consists of 2 sections:

B Products list and technical designs

Selecting the catalogue or the range A the codes are displayed B with: picture, description, front view, side view and dimension view.

To insert the design into an Autocad[®] project is necessary to click 2 times on the picture of: front view, side view or dimension view and put it into the CAD working area, the technical design is inserted in the project as a block in this way is possible to move it or rotate it easily.

	2 Left Click					
Per inserire il dimensionale nel progetto, diccare due volte sull'oggetto da inserire e posizionarlo nell'area di lavoro
