

Window20

The **Window20** barrier is a special technopolymer partition designed to ensure correct social distancing for indoor working environments. Universal size, Window20 can be positioned on reception desks, office desks, commercial counters or other similar contexts.

The exclusive advantages of Window20

Convenient bottom opening

The opening at the bottom of the product allows the exchange of documents from one side to the other in total safety. For this reason Window20 is ideal for offices with close workstations or with counters open to the public.

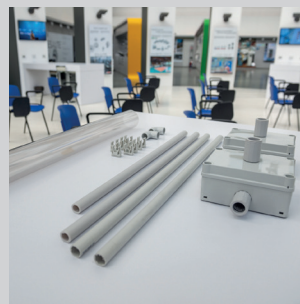

Light and sturdy structure

Window20 can be positioned without the use of screws thanks to its sturdy and stable structure, totally made in technopolymer, which makes this product incredibly light and simple to move at any time.

A transparent and easy to clean screen

Window20 a translucent semirigid screen, allows perfect visibility on both sides and does not require any type of special treatment cleaning.

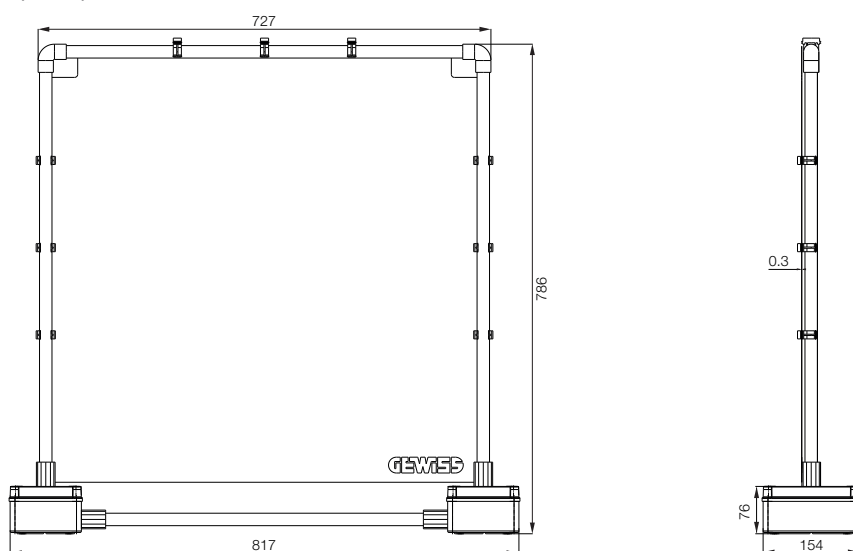

A kit suitable for every situation

The PVC screen and the support structure are an easy assembly kit which, thanks to its universal size (screen 70x70 cm), is perfect for banks, tobacconists, shops and other commercial businesses.
