

Product Data Sheet GW16004SSG

CHORUSMART - Domestic range

Smart plate can be used with Home Gateway for "CONNECTED SMART HOME" solutions. The EGO SMART plates integrate with the connected devices of the ChoruSmart system, they go beyond pure aesthetics and become an element of interaction with the user. The plates communicate with the other connected devices and, using RGB perimeter LED strips and a graphic display, can communicate operating statuses and any alarms detected by the smart functions that control the home to the user. The traditional EGO SMART and EGO plates can be used in the same system as they are designed to blend in perfectly.
