

Wall-mounting thermostat to control heating/cooling and humidification/dehumidification systems and manage the temperature in manual mode or on 3 levels (comfort, pre-comfort, economy). Control algorithms for two-way systems: two points (ON/OFF), proportional integral (PWM). Includes 2 output contacts for heating, cooling or humidity control. Includes 1 input for external NTC temperature sensor (for room temperature measurement compensation or for underfloor heating protection). Equipped with a user interface with touch controls (capacitive) on technopolymer plate and backlit display. The thermostat has built-in proximity, temperature and humidity sensors and a Wi-Fi interface for setting parameters and programming temperature profiles (timed thermostat function) locally or remotely via specific apps (smartphone and tablet).

The device can be used:

- as an independent intelligent thermostat (in a stand-alone way), i.e. without the need for a Smart Home system, in this case the configuration and control of the device takes place via the "ThermoICE 2.0" APP;
- integrated into the Gewiss "Connected Smart Home" system, in this case the device can interoperate with all the other devices of the "Connected Smart Home" system and is configured and controlled together with all the other functions of the system via the "Home Gateway" APP.

Wall-mounting installation with wall-plugs or on 3-modules rectangular boxes (centre distance 83.5 mm). Equipped with front plate. Plate material: technopolymer.

Catégorie	Thermostat Thermo Ice	Communication	Wifi
Couleur	Titane	Material	Front plate in technopolymer
Installation	Montage mural	Alimentation	110-230V ca - 50/60Hz
Current absorbed by power supply	< 3 W (in stand-by < 1 W)	Interfaces	Wi-Fi 2.4GHz IEEE 802.11 b/g/n
Grandeurs mesurées	Temperature, humidity, one additional input for external NTC temperature sensor	N. canaux en sortie	2 NO potential free
Contacts de sortie	Max switching current at 250Vac: 6A (cosΦ = 1); 1,5A (cosΦ = 0,6)	N. canaux en entrée	1 for external NTC sensor (type: NTC 10K, es. GW 10 800)
Tension des entrées	-	Bornes de câblage	À vis
Capacité de serrage des bornes câbles souples (mm²)	Max 1,5 mm²	Capacité de serrage des bornes câbles rigides (mm²)	Max 1,5 mm²
Température de fonctionn.	-5 ÷ +45 °C	Humidité relative (non condensant)	Maximum 93 %
Température de stockage	-25 ÷ +70 °C	Dimensions LxHxP (mm)	123,2x95,2x20,6
Indice de protection	IP20	Norme	Directive RoHS 2011/65/EU + 2015/863 Directive RED 2014/53/EU EN 60730-2-9; EN 60730-2-7; EN 60730-1; EN 301 489-1; EN 301 489-17; EN 300 328; EN IEC 63000
