

## Product Data Sheet GW16974CB

Home&Building Pro

Flush-mounting thermostat for controlling heating/cooling systems via BUS, and manual or 3-level temperature management (comfort, pre-comfort, economy). Control algorithms for two- or four-way systems: two points (ON/OFF or 0%/100%), proportional-integral (PWM or continuous 0%-100%), fan coil (max. 3 speeds with ON/OFF contol). Allows control of humidification and dehumidification systems if connected to an external humidity sensor (e.g. GW1x762H). Has 1 input for potential-free contact (for window contact function, for managing fronts, dimmers, shutters or scenarios); 1 input for NTC external temperature sensor (e.g. protection for underfloor heating) or, alternatively, as a second input for potential-free contact. Equipped with user interface with touch-type (capacitive) controls on glass plate and rear-projection display. The thermostat has integrated proximity and temperature sensors. Configuration is via ETS software.

temperature control: in this case, the thermostat acts as a slave, implementing the temperature profile sent from the master.

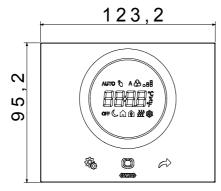

Equipped with a coupling terminal for connection to BUS. The thermostat includes a front plate, and is designed for screw fastening to either rectangular 3-gang boxes (83.5 mm centre distance) or round/square boxes (60 mm centre distance) equipped with installation columns. Plate materials: glass.

| Category  |  | Thermo ICE KNX thermostat                         | Comunication  | KNX   |
|---|--|---|---|---|
| Colour  |  | White   | Material  | Front plate in glass  |
| Installation  | Flush mounting on 3-modules rectangular (GW24403,<br>GW24403PM),<br>round (GW24234, GW24234PM) or square (GW24231) boxes |   | Power supply  | 12-24V ac/dc  |
| Current absorbed by power supply                                |  | Max 4,5 W (12-24Vac);<br>max 3,6 W (12-24Vdc)     | Interfaces  | KNX TP1   |
| Current absorbed by KNX bus (mA)                                |  | 10  | Measured sizes  | Temperature, one additional input for external NTC temperature sensor   |
| No. input channels  | 2 (in case a NTC ser   | nsor is used mustb a 10K type, e.g. GW<br>10 800) | Input voltage   | Potential free  |
| Wiring terminals  |  | With screw  | Terminal tightening cap<br>stranded cables (mm <sup>2</sup> ) |   |
| Terminal tightening capacity<br>solid cables (mm <sup>2</sup> ) |  | Max 2,5 mm <sup>2</sup>                           | Working temperature   | -5 ÷ +45 °C   |
| Relative humidity (non-condensative)                            |  | Max 93%   | Stocking temperature -25 ÷ +70                                |   |
| Connection to the KNX bus                                       |  | KNX bus terminal                                  | Dimensions LxHxD (mm) 123,2x95,2x10,7                         |   |
