

Die-cast aluminum floodlight powder poliester painted after trivalent passivation. Optic double rotation due to central junction equipped with graduated goniometer scale for the correct pointing. Flat tempered glass 4mm thickness. Anti ageing silicone gasket. Integrated components base for architectural applications. Electronic constant current driver. LED monochromatic technology version.

Application	Indoor / Outdoor	Optic	16° spotlight
Maximum surface exposed to the wind	0.118 m²	Minimum distance from the illuminated object	1 m
System power	50 W	Lumen output (lm)	4350
Colour temperature	4000 K (CRI>65)	Warranty	Can be extended
Operating temperature	-25 +25 °C	Driver type	Constant Current Driver Led
Version	With base	Efficiency class of integrated LEDs	A ÷ A++
Type of light source	LED - Not replaceable	Electrocod	2424
Light pollution	0 cd/Klm	Photobiologic Risk	RG1/RG2 @ 20cm
Nominal flux (lm)	5220
