

Industrial LED lighting fixture made of die-cast EN AB 46100 aluminium with polyester powder coating. Correct illumination is provided by an optical system composed of different versions of lenses and sealed by an extraclear tempered glass of 4 mm . Silicone gaskets, Goretex breathing and anti-condensation device, waterproof connector for $1.5 \mathrm{~mm}^{2}$ cables and stainless steel external screws. Integrated suspension fixing system thanks to a ring made directly in the die-cast aluminium. The die-cast aluminium structure guarantees optimal performance conditions both at $\mathrm{Ta} 25^{\circ}$ and $\mathrm{Ta} 50^{\circ}$ thanks to specific thermal sizing tests. The correct heat dispersion inside ESALITE is guaranteed by the special passive heat sink with a very low copper content that offers high qualitative and quantitative performances.
