

Wirelessly connected device with Zigbee protocol from the ChoruSmart system. It can be used with Home Gateway for "CONNECTED SMART HOME" solutions and with Smart Gateway for "HOME AND BUILDING PRO" solutions. Ideal for residential and small commercial offices, new builds and renovations. Zigbee technology is a secure and reliable technology in which data is encrypted and every node within the network ensures reachability across all devices (mesh network). This device can also be used without Home Gateway and Smart Gateway (manual configuration with dip-switch or via IoT Configurator), in which case supervision via the app is not possible.

kategoria	Inteligentna wtyczka	Kolor	Biały
Protokół komunikacyjny	Zigbee (IEEE 802.15.4)	Maks. prąd w zestawie	10 A
Moc wyjściowa	8 dBm	Maks. rozpraszalna rozpraszalna (W)	2 W
lampy wtyczki	2P+E - 10A	Gniazdo elektryczne lampy	2P+E - 10A
Norma	2014/53/EU	Ochrona IP	IP40
Długość Temperatury	0 ÷ +40 °C	Temperatura przechowywania	-20 ÷ +80 °C
Wilgotność względna (bez kondensacji)	Max 93%	Wymiary ØxH (mm)	41x45
Electrocod	051A
