

A system of command and control wireless devices based on Zigbee technology that offers innovative solutions for the renovation of buildings, minimizing the structural interventions. Zigbee is a safe and reliable system because the data exchanged are encrypted and every node of the network always ensures reachability among all the devices (mesh network). The Zigbee devices enrich the range of home&building automation solutions by Gewiss and can be managed via App, with smartphone and tablet, through the Smart Gateway.

Descriere	1 modul	Categorie	Obturator
Culoare	Alb	Simbol	Frecvență radio
Adecvat pentru	Contacts interfaces, Zigbee actuators	Termo-presiune cu bilă	125 °C
Glow Test conductori	850 °C	Standard	EN 60669-1
Nr. module Chorus	1	Electrocod	0100
